

Chief Acoustics Engineer
Safety and Environment Business Group
Canberra Location
TP3 (\$84,003 - \$100,033) + 12.5% superannuation

We are a government-owned corporation providing safe and environmentally sound air traffic control management and related airside services to the aviation industry. In a region covering 11 per cent of the world's surface, we manage air traffic operations for around 63 million passengers on more than 4 million domestic and international flights every year.

This position provides expert advice and support for Airservices' environment management strategy and activities, particularly in relation to acoustics and aircraft noise issues. It provides technical leadership to the Noise and Flight Path Monitoring System and the management of range of services provided by the NFPMS contractor.

Your principal responsibilities will include but are not limited to;

- Provide technical leadership for the management of the Noise and Flight Path Management System (NFPMS), including managing operational and quality control issues with the contractor
- Provide strategic and operational advice on the management of the NFPMS and its data to ensure that business objectives are realised and that the system is optimised.
- Develop, implement and review quality assurance and KPI monitoring plans for the NFPMS, including regular review of configuration
- Ensure that reports and other products and services provided by the section are timely, accurate and high quality.
- Lead and manage a small team of technical specialists

To thrive in this position you shall possess the following knowledge and experience;

- Demonstrable experience and a successful track record of providing technical acoustics advice at a senior level.
- Experience in successful contract and service provider management to deliver business objectives
- Capacity to initiate strategies and actions to achieve tangible results, with limited direction.
- Sound networking, representation, negotiation, and liaison skills, as well as a demonstrated ability to work as a team member.
- ***Tertiary qualifications in acoustics or a related discipline are a MUST***

This is an engineering job with a difference. In return for your effort and expertise Airservices will offer you a competitive salary, exciting career development opportunities and performance reward.

To apply for this position and respond to criteria please lodge an application online via our website: <http://http://www.airservicesaustralia.com/careers>

Further information can be sought by contacting Paula McMahon on 02 6268 4785or paula.mcmahon@airservicesaustralia.com

Applications close at 11:00pm Wednesday 24th February 2010.

Airservices Australia is a government-owned body corporate providing the aviation industry with services such as air traffic control, navigation facilities and aviation rescue and fire fighting.

Airservices Australia values social and cultural diversity and is committed to the principles of equal employment opportunity and the provision of a safe and healthy work environment.
