We can offer you

- Challenging opportunities across a broad range of industry sectors and locations.
- A great career and excellent advancement prospects in a firm that recognises the value acoustical engineering can contribute to project outcomes.
- Attractive remuneration packages, five weeks annual leave and a highly collaborative team environment.
- Intermediate and senior positions are currently available throughout our offices in London, Manchester, Sydney, Melbourne, Brisbane, Canberra, Perth, Adelaide and Auckland.

Norman Disney & Young is Australia’s largest privately owned building services consultancy. We also have a major presence in New Zealand and the UK. NDY Sound, the firm’s specialist group of experienced acoustics engineers, is committed to sharing knowledge and developing new technologies. This enhances the service we offer our clients and aids professional development.

Norman Disney & Young has an enviable record of professionalism and innovation. We consistently deliver a range of highly specialised services, which have found strong acceptance by our clients. We are committed to further growth and are focused on providing high-quality advice to our growing list of clients.

NDY Sound is currently seeking acoustic engineers at the following levels:

- **Managers:** Acoustic consultants with proven abilities to market acoustic consulting services, to direct a team of acoustic engineers and manage client delivery.
- **Senior Acoustic Consultants:** Established acoustic consultants ready to take on project coordination and lead multidiscipline teams, to drive research and development initiatives and manage project deliverables.
- **Acoustic Consultants:** Established acoustic consultants willing to take on challenging projects, work with industry leaders and contribute to the technical output of the firm.

Qualifications

Applicants should have degrees in mechanical engineering, which are acceptable for CPEng status with the Institution of Engineers Australia and/or post graduate qualifications in Acoustics. Applicants with other qualifications relevant to the field of acoustics are also encouraged to apply.

Your experience in architectural, building, audio visual/production, environmental, industrial and infrastructure projects are of particular interest.

Applications

Applications will be treated in the strictest confidence. Submit a covering letter and resume detailing your qualifications and experience to:
