

We want you to join our new Noise and Vibration team

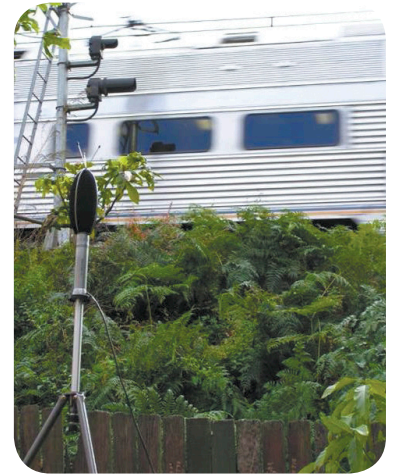

We are looking for Acoustics, Noise and Vibration Technical Specialists to join this newly created business unit.

Positions available:

- Technical Specialist – Noise and Vibration (Ref: EPGPS 10/62E)
- Technical Specialist – Acoustics (Ref: EPGPS 10/63E)

These positions are broadly focused on all acoustic issues associated with RailCorp facilities and assets including:

- Environmental and engineering noise and vibration issues
- Acoustic design and control of fixed rail facilities and rolling stock
- Noise, vibration and harshness (NVH) customer comfort
- Building acoustic and audio design
- Speech intelligibility and the audibility of warning devices.

Introducing our team

Working closely with RailCorp's existing Noise Specialists, our team covers the entire life cycle of railway capital projects, from concept planning to commissioning, encompassing a broad range of technical aspects in acoustics, noise and vibration.

Together we capture, share and use technical knowledge gained from similar noise and vibration projects and research.

We are currently involved in an exciting range of railway projects including Sydney's next generation Waratah trains, the introduction of the South West rail link and infrastructure upgrade projects like the Rail Clearways Program.

Interested? Please visit www.railcorp.info/careers for a complete position description or to apply.
