

STATE MANAGER - VICTORIA

Employer: PAEHolmes
Location: Melbourne

PAEHolmes is recognised as a leader in their field with a client base comprising major Australian and international companies, as well as federal and state government departments.

With a focus on managing emissions to the atmosphere and energy systems, PAEHolmes projects (in Australia and overseas) include environmental impact assessments, atmospheric dispersion modelling, ambient air monitoring, odour and dust assessment, emissions inventory development, climate change management, applied meteorology, regulatory reporting, and human health and ecological risk assessment.

Additionally, in response to our clients' needs, PAEHolmes have developed complementary services in acoustics, specialising in environmental noise impact assessment.

PAEHolmes are looking for a senior practitioner to manage the expansion of our air quality and acoustics services in Victoria, and to provide managerial support to our sister company Toxikos. If successful, you will benefit from working in a growing company in a role with considerable responsibility and career development opportunities. You will also be exposed to a diverse range of projects across a variety of industries including oil and gas, mining, power generation, waste, resources, manufacturing, chemicals and agriculture.

Please send applications and correspondence to recruitment@paeholmes.com

Applications close: 18 November, 2011
