

## SENIOR ACOUSTICAL CONSULTING ENGINEER

- Position:** A Senior Acoustical Consultant position is now open at BKL Consultants Ltd. ([www.bkl.ca](http://www.bkl.ca)).
- Context:** We are looking to add a new member to our architectural acoustics team. BKL is involved in a large and diverse range of projects in terms of target markets, project delivery methods, and fields of acoustics. We consult to commercial, institutional, education, industry, entertainment, arts, transportation, residential, etc. markets. Our work includes room acoustics, sound isolation, mechanical (HVAC) noise control, mechanical and electrical equipment vibration isolation, outdoor noise propagation, etc. Project delivery methods include traditional delivery (architects, clients), design build, public private partnership (P3), etc.
- Your contribution to projects would span the entire duration of the process which may include: RFQ, RFP, DD, CD, CA and Commissioning. You will be expected to fully manage all aspects of your projects, working independently with minimal supervision but with access to support and resources. You will personally carry out the majority of the work on many projects but will take a project management role on others, managing the contribution of junior and intermediate consultants to meet project milestones. As a senior consultant, your responsibilities will include client management, preparation of proposals and in-house tasks but the majority of your time will be chargeable to project work.
- Requirements:** Candidates must have excellent analytical skills, a solid understanding of acoustics and very good spoken and written communication skills. Knowledge of current MS Office Suite, drafting and acoustics software applications is expected plus an ability and willingness to learn new tools. Experience with test equipment and methodology for sound and vibration measurements is mandatory.
- Candidates should have university level education, preferably in the field of engineering with professional registration. A minimum of 8 years relevant consulting experience in the field of acoustics is required.
- Employer:** BKL has provided consulting services in acoustics since 1966. We have projects of all sizes, with an even distribution of building and environmental acoustics work. The firm is a well established, successful small business with excellent opportunities for career advancement. We have a great group of employees and a friendly work environment.
- Compensation:** Salary commensurate with experience; overtime paid at time-and-a-half; generous vacation allowance plus 12 holidays; full cost of health and long-term disability insurance; professional association dues and various subsidies.
- Location:** North Vancouver, BC, Canada. Mild climate, exceptional recreational opportunities; office located on Vancouver's scenic North Shore, close to Vancouver but outside of city centre.
- Apply by email to:** Mr. Tiberiu Spulber P.Eng. [spulber@bkl.ca](mailto:spulber@bkl.ca)
