NEW SOUTH WALES DIVISION
TECHNICAL MEETING

**Regulating Construction Noise from Major
Transport Infrastructure Projects**

The Date: Wednesday 14th September 2005

The Venue: NATIONAL ACOUSTICS LABORATORIES
126 GREVILLE STREET, CHATSWOOD

The Time: 6.30 pm to 7.30 pm

The Speaker: James Goodwin

Construction noise is invariably one of the key environmental issues associated with major road and rail infrastructure projects. Consequently, managing noise from construction activities is one of the Department of Environment and Conservation's (DEC's) principal concerns in its regulation of road and rail construction.

In this presentation, James Goodwin will be explaining what the DEC is seeking to achieve in regulating projects, the different types of requirements employed in construction licences and the factors that influence the DEC's decision-making. The role of noise impact assessments, community perspectives and current practices will also be covered.

RSVP: by Monday 12th September to Rodney Stevens

rsaacoustics@optusnet.com.au

if no email available ring Rodney on 9542 7979

All Welcome. Refreshments will be provided
