

# Australian Acoustic Society (QLD Division) Technical Meeting

## Insights from the East: Planning for Noise Control in Redland Shire Council

Guest Presenters:

Geoff Doyle  
Team Leader

Sally Evans  
EHO

### **Pollution Prevention Redland Shire Council**

Redland Shire Council has increasingly been active in assessing and addressing noise impacts of development since the mid 1990's. A lot has changed since then – no change more significant than the commencement of the new [Redlands Planning Scheme \(RPS\)](#) in March.

Yes, we have moved on from having plastic coated chain wire fences being an acceptable solution to noise control! The RPS sets a new era for development assessment in the Shire, including improved tools for dealing with noise issues.

The presentation aims to provide a how-to guide in navigating the new scheme, as it relates to noise issues. Additionally, discuss Council's position in relation to acoustic issues, including our vision in relation to acoustic design and treatments as they relate to development works. Some examples of the good, the bad and the downright ugly noise treatments applied in recent times will also be discussed.

If you are undertaking assessments as part of development applications within the Shire, or are interested in the Council's future directions for noise policy in Redlands, then you will find this presentation of interest.

#### **DATE AND TIME:**

**Wednesday 7th June 2006**  
**6:30pm**

#### **COST:**

Member/subscriber	Free
Non-members & guests	\$10

#### **VENUE:**

QRI Conference Room  
QLD Railways Institute  
Central Railway Plaza - next to the QRI Café  
Shop 1, 309 Edward Street City  
(above Central Railway Station)
