

JOB DESCRIPTION

Noise & Vibration Consultants – Multiple Locations

Unprecedented levels of demand have led us to seek experienced noise and vibration consultants to join our team. Pacific Environment (an ERM Group Company) is looking for motivated acoustics professionals to join our Sydney, Brisbane, Perth, Melbourne and Adelaide teams. We have a number of positions available from consultant to senior consultant level.

Pacific Environment is recognised as a leading air quality and acoustics consultancy, with a client base comprising major Australian and international companies, as well as federal and state government departments.

Our projects (in Australia and overseas) include impact assessment and mitigation, noise and vibration monitoring, noise and vibration assessment, dispersion modelling, odour and dust assessment, emissions inventory development, carbon management, applied meteorology, and regulatory reporting.

ROLE PROFILE:

To support the successful delivery of Pacific Environment projects and objectives by:

- Providing completed tasks and inputs into elements of projects and or proposals
- Building effective working relationships within project team, discipline and business unit
- Developing fundamental consultancy skills
- Understanding Pacific Environment practices, products and services.
- Meet business financial targets, overall project budget and schedule, client satisfaction/expectations, and internal and contract requirements.

QUALIFICATIONS

For consultant positions, ideal candidates would have a minimum of 3 years' relevant experience in a consulting environment, with the following:

- Tertiary qualifications (or higher) in engineering, science, meteorology or chemistry
- Understanding of the regulatory requirements and relevant legislation
- Good verbal and written communications skills, with attention to detail
- Ability to build and maintain effective working relationships
- Strong initiative with the ability to work independently where required
- At least 3 years knowledge and experience in acoustic assessment, noise and vibration measurement
- experience in acoustic modelling (CadnaA / Soundplan / Predictor)
- High level Excel skills including data manipulation

In addition, for the senior consultant roles, we are also seeking:

- Flexibility to conduct a variety of assessment and tackle complex problems using innovative solutions
- Project management experience with accountability for managing project risk and delivering performance
- Client engagement activity with a local network and recent business development successes

- Proven ability to complete projects within budget and on schedule
- A genuine desire to work with a great team and to mentor and develop your colleagues

TO APPLY:

In return, you will be part of a growing dynamic company that clients trust and choose to engage; and where employees are empowered to develop their career and love to work. With our recent acquisition by ERM, we have become part of a global environmental consulting company and can offer a structured career path with outstanding opportunities.

If you are a highly motivated and results-orientated person looking to make your mark in a leading environmental consultancy, then we would like to hear from you!
