

Acoustic Engineer

We are a privately-owned company specialising in providing innovative engineering solutions within the Acoustics / Noise Control industry. We are seeking an experienced engineer to join our team in Brisbane.

The successful applicant must possess the following skills & experience:

- Degree in Mechanical Engineering
- Previous experience in design and project management within the acoustic / noise control industry sector is essential
- Understanding of drawings and technical specifications
- Experience working in a manufacturing / fabrication environment highly desirable
- Must be able to deliver and set high standards at all times
- Hands on approach and a willingness to understand every aspect of the operation of the business
- Absolute focus on compliance and safety

Duties will include but not be limited to:

- Design & Documentation of Noise Control Equipment
- Project Management
- Provide Engineering Support to Sales

An attractive salary package will be commensurate with the skills and background of the successful applicant.
