

Acoustics Australia

**Annual Index
Vol 33 2005**

PAPERS

Brooks LA, Morgans RC & Hansen CH

Learning acoustics through the boundary element method: an inexpensive graphical interface and associated tutorials, No 3, 89-95

Choi Y-J and Cabrera D

Some current issues in computer modelling for room acoustic design, No 1, 19-24

Fletcher NH

Acoustic systems in biology: from insects to elephants, No 3, 83-88

Howard, C

An inexpensive DIY impact hammer for vibration analysis of buildings, No 1, 13-18

Inta R, Smith J and Wolfe J

Measurement of the effect on violins of ageing and playing, No 1, 25-29

Moorhouse A

Virtual acoustics prototypes: listening to machines that don't exist, No 3, 95-105

Remennikov A and Kaewunruen S

Determination of dynamic properties of rail pads using an instrumented hammer impact technique, No 2, 63-67

Simpson A, McDermott HJ and

Hersaback AA

Relationship between speech recognition and self-report measures, No 2, 57-62

Williams W

A variation to the sound level conversion measure of hearing protector performance, No 2, 51-55

Wu H, Fitzell, B and Samali

Control of eccentric building vibration with base isolation, No 1, 7-12

Zhang ZY

A simple function for modelling three-dimensional scattering strength from the ocean surface, No 2, 47-50

ACOUSTICS FORUM

Fletcher NH

What are we doing about exhaust noise?, No 3, 106

Fricke, F

A code of ethics for the Australian Acoustical Society, No 1, 31
