The Australian Acoustical Society
South Australian Division

will be hosting a one-day event

Environmental Noise Symposium

To be held on

Friday 17th June, 2005

at

The University of Adelaide
North Terrace Campus

The Course

The course will cover the principles and practice of environmental noise assessment, control and planning. It is a basic course that will include practical information that can be applied to real situations in the workplace or the community and will be presented at a level appropriate for people who wish to gain contemporary knowledge of the subjects.

The symposium will comprise speakers from a broad range of backgrounds who regularly deal with noise issues such as planners, lawyers, health professionals and Members of the AAS.

A 'hands-on' measurement session will also be included to enable a better understanding of what is involved in environmental noise assessments and their limitations.

Who should Attend?

This course is ideal for people who are at any level involved in or interested in

- environment planning and development;
- health issues related to environmental noise; and
- the impact of industrial, commercial, recreational, transportation and entertainment noise.

Course Program
