

Australian Acoustical Society

A.C.N. 000 712 658

VICTORIA DIVISION

c/- N Broner, SKM, 452 Flinders Street, Melbourne VIC 3000

NOTICE OF EVENT

Federation Square, 7000 square meters, Barrisol Lumiere translucent

Properties and applications of micro-perforated materials

The Victorian division of the Australian Acoustical Society and Barrisol are pleased to invite you to a technical seminar on micro-perforated materials.

Date: Monday 7 November 2011
Time: 6:00pm for 6:30 start
Venue: SKM Office, 452 Flinders St, Melbourne (nearly opposite the aquarium)
RSVP: Monday 2nd November 2011 to vic-secretary@acoustics.asn.au

NOTE: Due to card access only, we will collect attendees from the Foyer every 10 minutes from 6.00 PM to 6.40 PM.

Victoria Division of the Australian Acoustical Society

Properties and applications of micro-perforated materials

Dr. Christian Nocke
Akustikbüro Oldenburg, Oldenburg, Germany
www.akustikbuero-oldenburg.de

Disclosures
Barrisol

The theory background of micro-perforated sound-absorbing panels was first described by D.-Y. Maa in 1975. Since Maa's seminal contribution, many variations of micro-perforated sound absorbing materials have been introduced. Micro-perforations have been applied to metal, wood, plastics and many other materials. In 2001, a nearly invisible micro-perforation was applied to stretched membrane material, yielding high sound absorption performance, while not being an overtly obvious sound absorbing material. Stretch membranes are custom manufactured to any panel size, offering an acoustic solution for rooms not restricted by fixed prefabricated panel sizes. In his presentation, Dr. Nocke will outline the theoretical background of micro-perforated materials and the application of these to stretch membrane materials. He will also detail the sound absorption coefficient results of various laboratory based tests with micro-perforated stretch membranes he has conducted (with & without additional acoustic materials) and finally present some examples of room acoustics before and after the installation of micro-perforated ceiling and wall membranes.

Dr. Christian Nocke

born: November 16, 1967 in Osnabrück, Germany

- 1990 to 1995** study of physics at Philipps-University Marburg and Carl von Ossietzky University Oldenburg; degree: Diplom
- 1996 to 1999** PhD scholarship from Federal Government (Studienstiftung des deutschen Volkes) supported by Prof. Volker Mellert and scientific staff at Fraunhofer-Institut for Building Physics (Department of room acoustics / technical acoustics, Stuttgart)
- Summer 1999** three month research visit to Institute of Acoustics in Beijing (PR China) visiting Prof. D.-Y. Maa; work about micro-perforated sound absorbers.
- March 2000** PhD (Dr. rer. nat.), defense in March 2000 – topic: *In-situ Messung der akustischen (Wand-)Impedanz* (*In-situ measurement of the acoustical (wall-)impedance*), scientific staff at Oldenburg University, Dep. of Physics until end of 2000.
- 2000 to 2002** lecturer for physics at Fachhochschule
- 2001** Oldenburg/Ostfriesland/Wilhelmshaven, department of nautics
founding of *Akustikbüro Oldenburg* (acoustical consultancy)
- 2001 to 2004** head of office of German Acoustical Society (Deutsche Gesellschaft für Akustik DEGA e.V.) in Oldenburg; during this time organisation of three annual meetings (Bochum, Aachen, Straßburg joint with SFA)
- Since July 2002** from Oldenburg chamber of commerce publically announced and certified expert for noise immissions, building and room acoustics (von der Oldenburgischen IHK öffentlich bestellter und vereidigter Sachverständiger für Lärmimmission, Bau- und Raumakustik)
- 2004** founding of *Höfker Nocke Bückle Partnerschaft – Physiker und Ingenieure* (partnership company) with offices in Bochum, Oldenburg and Stuttgart, see www.hnb-bauphysik.de
- 2004-2006** lecturer for building physics (building and room acoustics) at Fachhochschule Oldenburg/Ostfriesland/Wilhelmshaven, department of architecture
- 2008-2011** lecturer for acoustics (sound propagation outdoors) at Hochschule Bochum, department of mechanical engineering
- Publications:** see list „Veröffentlichungen“ at www.akustikbuero-oldenburg.de
- Memberships:** ASA - Acoustical Society of America,
NCAC - National Council of Acoustical Consultants,
VBD - Verband der Bausachverständigen Deutschlands e.V.
