NOTICE OF TECHNICAL MEETING

AAS Members and interested parties are invited to the following event

Prof. Gary W. Evans, on the Effects of Environmental Noise on Children's Health and Cognition

Topics for Architects / Planners / Educators (Public Event):

9am Friday November 15, 2013
Lecture Theatre, Grace Vaughan House
227 Stubbs Terrace, Shenton Park

Topics for Acousticians (AAS Members Event):

5:30pm Thursday November 14, 2013
NDY, Level 11, 200 St Georges Terrace
Perth WA 6000

Register for this exclusive workshop with a leading international specialist in children's health and cognition, Professor Gary Evans of Cornell University, New York State.

Evans' research on noise has includes the 'non-auditory' impacts – the effects not caused by hearing damage.

He has completed extensive work examining the effects of noise on children's cognition and reading, motivation and physiological stress, including uncovering underlying mechanisms to help account for these impacts.

Of particular importance to health and legal policy, the levels of noise producing these effects are not as high as those which cause temporary or permanent hearing effects, and typically result from poor design and management.

This presentation will be of interest in those involved in the design and management of areas relating to children's healthcare and learning.

About Gary Evans

Professor Evans is an environmental and developmental psychologist interested in how the physical environment affects human health and wellbeing among children. His specific areas of expertise include children's environments, the environment of childhood poverty, cumulative risk and children, environmental stressors, and the development of children's environmental attitudes and behaviours.

<http://www.human.cornell.edu/bio.cfm?netid=g>

Professor Evans is the author of over 250 scholarly articles and book chapters plus five books, and is an international leader in his field. He has been awarded two Fulbright Research Fellowships and is the recipient of a Senior National Research Service Award from the National Institutes of Health.
