

Environment Officer (Noise)

- Join an organisation that is undertaking large scale strategic transformation
- Fixed term full time opportunity to 2022
- North Sydney / Parramatta
- We offer flexible options (including Flextime) for structuring your working week

About us

Roads and Maritime Services is one of Australia's leading public sector agencies with more than 5,500 employees and an annual budget in excess of \$7 billion. As part of Transport for NSW we are responsible for implementing strategic and essential frontline services to the people of NSW who use roads, harbours and waterways.

The **Environment team within the Business Services division** aims to improve our environmental performance and positively influence the performance of our service providers. Our aim is to assist in the delivery of efficient and effective environmental outcomes and to manage risks that may lead to an impact on the environment. We work in partnership with our stakeholders to provide specialist environmental advice and services that effectively manage risks to the environment and support delivery of RMS business objectives.

The Opportunity

As an **Environment Officer (Noise)** you will work closely with a professional team and provide expert advice and assistance to staff and RMS Contractors on environmental planning, management, assessment and compliance requirements. Your role would also include input and support into the development of policy and guidelines and training to RMS staff as required.

About you

To be successful in this role, you will be energised by the prospect of delivering best practice environmental outcomes for communities across NSW. Your passion and determination will influence the implementation of responsible and compliant environmental management practices. This role is perfect for an motivated and confident engineering, science or environmental professional who is particularly interested in acoustics, specifically in noise modelling, assessment and mitigation of road infrastructure projects. You might be working in a consultancy and seeking a client side role in a large and industry-leading organisation. If you are ready to make a real impact in NSW communities and leave a legacy of achievement that will last for generations please get in contact today.

Essential requirements

- Relevant tertiary qualification in engineering, science or environmental science, environmental planning, environmental management or related discipline, preferably with a focus in acoustics
- Strong post-tertiary background, experience and capability in acoustics, specifically in noise modelling, assessment and mitigation of road infrastructure projects

Benefits

When you join Roads and Maritime, you become part of a forward-thinking organisation that does more than generate profit, we keep millions of Australians safe while they are on the move and offer generous working conditions, flexible working options and a real commitment to developing your skills.
