

# SENIOR ACOUSTICS ENGINEER

## AECOM MELBOURNE

Is building acoustics your profession?  
Are you interested in the opportunity  
to develop to your full potential  
while working for one of the largest  
professional services firms in the world?

We are seeking an acoustics consultant  
with experience primarily in building  
acoustics to join our Melbourne team.  
Our team has a collaborative and vibrant  
culture, comprises a group of engaged  
professionals, and is looking forward to  
welcoming a like-minded individual.

You will be joining a large group  
of acoustic consultants that work  
collaboratively to share skills and deliver  
projects of great significance across  
markets such as healthcare, education,  
commercial and aviation. Our group  
enjoys developing and employing  
innovative practices such as auralisation  
and 3D acoustic computer modelling,  
and uses these to collaborate with the  
major architectural practices in Australia.

You will have the opportunity to work  
across all areas of acoustics, providing  
you with scope to diversify your  
skills. AECOM is a large and diverse  
organisation, offering opportunities  
that extend beyond your core discipline,  
should you wish to explore broader  
career options over time. Our acoustics  
team embraces flexible working, and  
we would encourage you to make  
use of these to suit your personal  
circumstances. AECOM also offers  
a range of benefits to staff including  
discounts at many major retailers, salary  
packaging, the option of purchasing  
additional annual leave, paid maternity  
and parental leave, and a range of  
employee assistance and support  
programs.

### KEY RESPONSIBILITIES OF THE ROLE:

- » Lead the acoustics discipline on major AECOM projects;
- » Perform acoustic analysis, design and modelling on building projects;
- » Undertake occasional field work, e.g. noise measurements on site;
- » Writing technical reports and contribute to the delivery of projects;
- » Perform project management tasks;
- » Attend meetings with clients;
- » Mentor junior members of the team;
- » Provide a high level of service for clients and members of the project team.

### ABOUT YOU:

- » Engineering or science degree in a relevant discipline, post-graduate qualifications will be an advantage;
- » At least 5 years acoustic consulting experience;
- » Strong writing and communication skills;
- » Experience with acoustic computer modelling software, such as SoundPLAN, CadnaA, or Odeon will be viewed favourably;
- » Experience or specialist capabilities in other related fields, such as vibration, or performance spaces acoustics, will also be viewed favourably;
- » Experience in performing noise measurements.
