## SENIOR ACOUSTICS ENGINEER

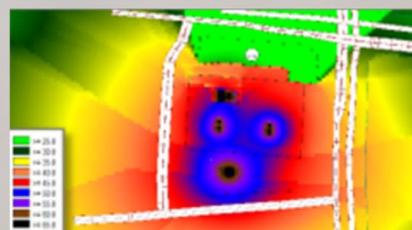

Sealhurst are a specialist Acoustic Design and Engineering firm that is active and working with a diverse range of top tier clients, where we apply our technical expertise to assist with developing acoustic solutions within residential & commercial buildings and construction, environmental, industrial and the public realm sectors. Whilst we are proud of our diverse portfolio of clients and our continued growth since 2012, we do not sit on our laurels. We have a steadily increasing workload and future project planning that now requires us to grow our team with the right Senior Acoustic Engineer to service our existing clients, whilst also assisting to further develop the service offerings of our practice.

We are different. We are a small, agile and dynamic business that is fast paced and is renowned for providing best for business service and productivity – we are now coupling this with our current trajectory toward ISO 9001 accreditation which we anticipate imminently, demonstrating our commitment to quality-led processes and practices, efficiently applied to the small team environment. A normal day is hard to define; as the work is varied, challenging, creative and interesting. It requires a self-driven, hardworking, intuitive and highly technical Engineer, with a flair for innovation who is looking for something more than just the traditional stimulus from their career.

Our environment is unique; it provides team members the opportunity to grow and develop whilst delivering their best work to our clients. We offer incredible flexibility in terms of role, responsibilities and hours, etc., to the successful candidate, allowing the position on offer to fit into a range of individual circumstances.

### Key responsibilities for this role will include:

- Performing acoustic analysis, calculations, design and modelling on a range of project types;
- Undertake field work, e.g. noise measurements on site;
- Preparing acoustic reports for internal and external clients, on time and within set budgets;
- Providing advice and assistance to internal and external clients, team members and contribute to the delivery of projects using best principles and practices;
- Represent the Sealhurst brand (protecting and enhancing our reputation in the market place) when attending meetings with clients;

# Acoustics. Translated.

- Mentor junior members of the team;
- Provide a high level of service for clients and members of the project team;
- Carrying out all technical tasks diligently with a strong focus on accuracy in calculations, data analysis, modelling and design;
- Assisting in the development and implementation of team business plans and strategies, where appropriate;
- Developing, facilitating and enhancing relationships between our internal and external clients; and
- Contributing to winning work by identifying and converting opportunities and drawing on your client relationships.

**To be effective in the role, the successful candidate will have an extensive background in Acoustic Engineering along with the following:**

- Relevant tertiary qualifications in Acoustic Engineering, Engineering or science degree in a relevant discipline;
- 7 to 10 years' experience within a Senior Acoustic Engineering role in an established reputable practice;
- Proven and demonstrable experience with Sound Insulation Testing, Multi-Residential Development, Mixed Use Development, Commercial Development and Road/Rail Transportation Noise modelling. Experience within Environmental Noise will be highly advantageous;
- Excellent communication skills with internal & external clients at all levels;
- Experience in performing noise measurements;
- Experience with acoustic computer modelling software, such as SoundPLAN, CadnaA, or Odeon;
- Strong report writing and presentation skills;
- Proven skill and experience in the delivery of a workable/practical solution(s) through a full project lifecycle;
- Australian citizenship/working rights are mandatory.

Our office is located 20 minutes from the CBD (by car), in a tranquil and relaxed environment. There are great staff amenities; a gym, free on-site parking, extended annual leave (25 days P.A.), excellent infrastructure and the potential opportunity for long-term career growth options.

To register your interest in this rare and exciting opportunity, please write to us outlining your experience, education and expectations along with providing your C.V. to [admin@sealhurst.com.au](mailto:admin@sealhurst.com.au).

Applications will be assessed as they arrive.
