

## Experienced Acoustics Consultants – ACT/ Sydney/ Melbourne

### About ACOR

ACOR is a national, employee-owned engineering consulting firm, offering a full range of specialist engineering services across multiple sectors. We have a proven track record for the successful delivery of large-scale multi-discipline projects, as well as smaller niche assignments. Our client's needs are at the core of everything we do – their success is our success.

We are proud of our workplace culture, and we reward and recognise our people who best represent our company values of *excellence, passion, caring, integrity, collaboration* and *courage*.

We are seeking experienced Acoustics Consultants to join our growing teams in Canberra, Sydney and Melbourne. The positions are responsible for acoustic designs and assisting the acoustics team to document those designs. Working closely with other disciplines and the various services teams, our Acoustics Consultants will coordinate multi-disciplined projects.

### Your role:

- Undertaking acoustic and vibration assessments as required, including environmental noise, occupational noise, industrial noise and vibration, road traffic noise and vibration, rail noise and vibration and building acoustics
- Developing acoustical design projects (or components of projects), design basis, scopes of work, etc.
- Following guidance of senior staff in managing acoustical design and documentation
- Taking responsibility for the internal management of the delivery and planning for allocated projects
- Understanding, identifying, and proactively managing project risks
- Attending and, where required, leading ACOR acoustic representation in project design meetings with Client teams

### Your Skills & Experience:

- Bachelor's degree in Science or Engineering with a focus on acoustics
- Minimum 2 years acoustic consulting experience across a range of sectors, including roads, rail, aircraft, industrial buildings, environmental and occupational noise
- Competent in environmental noise modelling packages (e.g. SoundPLAN)
- Understanding of building acoustics design/modelling, including use of EASE software or the like
- Competent in the use of sound level meters and noise and vibration logging equipment

### Benefits of ACOR:

- Attractive remuneration package commensurate with experience
- Employee Assistance Program
- Discounts on everyday products and services
- Regular social and fundraising events
- Ongoing learning & development
- 100% employee owned company
- An equal opportunity employer
