

Vipac Engineers & Scientists Ltd is seeking to recruit an experienced engineer to work in a team of engineering consultants specialising in acoustics and/or vibration. The position is based in Chester Hill, NSW with onsite staff parking available. The role will involve project work within NSW and may involve work on national projects.

Vipac is a multi-disciplinary, nationwide engineering consultancy that provides vibration, acoustics and other services. We provide for building, infrastructure, oil and gas, industrial, mining and commercial clients.

We are looking for the following skills and attributes from the successful applicant:

- A degree in mechanical/mechatronics engineering, or similar science degree;
- Familiarity with a broad spectrum of industries is preferred
- At least 5 years of industry experience, however more is preferred
- Experience in conducting noise measurements;
- Competent report writing skills;
- Willingness to travel for field work and flexibility with working hours;
- Strong communication skills;
- A team player who is able to work independently when required;
- A leadership role may be offered depending on skillset and experience; and
- The candidate must live in Sydney or immediate surrounds.

Project work will involve:

- Performing acoustic analysis, modelling, problem solving on a range of projects.
- Conduct field work as required with the use of our vast range of equipment
- Prepare acoustic reports for external clients, with a view to meeting technical and budgetary requirements
- Proven project management experience would be valued.

The remuneration will follow industry standards and be commensurate with experience. Professional development (internal and external) is encouraged at Vipac. We also have a health & wellbeing program employed throughout the company.

Please submit all applications, including a cover letter and resume by email to: joannal@vipac.com.au.
