

Acoustic Designer

About ACOR

ACOR is a national, employee-owned engineering consulting firm, offering a full range of specialist engineering services across multiple sectors. We have a proven track record for the successful delivery of large-scale multi-discipline projects, as well as smaller niche assignments. Our client's needs are at the core of everything we do – their success is our success.

We are proud of our workplace culture, and we reward and recognise our people who best represent our company values of excellence, passion, caring, integrity, collaboration, and courage.

As an Acoustic Designer, you will support the success of ACOR, both locally and on a national level. The ideal candidate will be able to demonstrate Acoustic consulting experience across a range of sectors, including roads, rail, aircraft, industrial buildings, environmental and occupational noise.

The primary specialisation in the Canberra region is design and assessment of buildings.

Duties & Responsibilities

- Undertake acoustic & vibration assessments – including but not limited to environmental/industrial/occupational noise, road traffic/rail noise and acoustic vibrations
- Developing acoustical design projects (or components of projects), design basis, scopes of work, etc.
- Attending and, where directed, leading ACOR acoustic representation in project design meetings with client teams
- Participating in design and safety reviews and risk assessments
- Taking responsibility for the internal management of the delivery and planning for allocated projects, proactively managing project risks

Skills & Experience

- Tertiary qualifications, ideally with a focus on Acoustics
- Member of the Australia Acoustical Society is desirable but not essential
- Acoustic consulting experience across a range of sectors
- Understanding of standards and legislation required to undertake acoustic assessments
- Demonstrable understanding of the acoustics discipline, including detailed knowledge of environmental noise assessment and reporting requirements and legislation
- Sound knowledge of industrial noise and vibration assessment and building acoustics is essential
- Understanding of project management processes and delivery with a good mix of technical and client management skills

Benefits of ACOR

- Attractive remuneration package, commensurate with experience
- Employee Assistance Program
- Discounts on everyday products and services
- Regular social and fundraising events

- Ongoing learning & development
- 100% employee owned company
