

## Roles in Acoustic / Vibration Engineering

Octave Acoustics is an acoustic consultancy with offices in Melbourne and Sydney. We are looking for enthusiastic people to join our teams in both states.

Founded in 2016, we have established a core of premium clients and undertaken a diverse range of project work, including cinemas, road infrastructure, shopping centres, vibration assessments, schools, universities, hospitals, professional sports facilities, civil infrastructure, solar farms, licensed premises, industrial installations, hotels, office and apartment tower developments, motor sports facilities, expert evidence, planning / DA assessments and cross laminated timber buildings.

Our offering focuses on collaboration to deliver 'best for project outcomes'. We are driven to deliver services of the highest quality. This direction, coupled with our distinctive growth strategy, presents significant opportunity for career advancement and fulfilment.

These roles are open to any level of experience or seniority with commensurate remuneration (Graduate – Principal). The key is your outlook, aptitude and enthusiasm driven by what Octave Acoustics can offer to your career.

Our goal is to maximise opportunities as defined and tailored by you, thereby driving your success, that of your colleagues and the organisation.

Applications should be sent to [admin@octaveacoustics.com.au](mailto:admin@octaveacoustics.com.au)
