

## Acoustic Engineers – Melbourne & Adelaide

- Adelaide & Melbourne positions
- Collaborative vibrant environment
- Expanding National business

Due to internal promotions and continued increased project workloads, there are opportunities to join our high performing team within both our Adelaide and Melbourne.

### Who we are

Our multi-award winning private firm prides itself on its vibrant culture. Flat structured; we thrive in a truly collaborative environment where everyone is encouraged and empowered to contribute and perform to their unique strengths and abilities. Sitting alongside Directors who are hands on, passionate and actively engaged in acoustic work, you would rapidly become integral to the team and a valued and respected colleague. Using the very latest technology we offer world-class solutions to our client portfolio. We are engaged on a prestigious and diverse range of work on some of the country's most prominent infrastructure, building and energy projects.

These opportunities would suit an engineer looking for a more vibrant and dynamic environment where they can truly enjoy and be proud of their varied work alongside like-minded, positive, fun loving professionals. In return our rapidly growing innovative consultancy can offer ongoing professional development and exceptional and unique health and lifestyle benefits. Our empowering culture and work-life balance and benefits are committed to the teams wellbeing in and out of work.

No timesheets and a fully cloud based operating system this is your opportunity to be you; enjoying your work and flourishing alongside people driven towards great client outcomes. With a staff bonus scheme; equity and leadership roles are also available for senior consultants passionate about the industry and with considerable drive, technical experience and natural interpersonal skills.

Resonate offers a competitive salary package, bonus scheme, and an opportunity to consult on a diverse range of projects and some of the country's most prominent infrastructure, building and energy projects.

### What you'll need to succeed

Your desire to delight clients through your project work and exceptional communication skills will see you succeed in this role.

In summary, we seek candidates who can:

- Provide clear and consistent communication with colleagues and clients
- Be highly organised
- Juggle multiple priorities
- Advocate for workplace safety and continual improvement of all business activities
- Live the Resonate cultural values

### Aspects that will strengthen your success

- Previous experience or studies in acoustic consulting, infrastructure and/or building sectors
- Membership of the Australian Acoustical Society and / or other relevant industry organisations will be considered favourably
