Closing date	30-June-2021
Yearly salary	\$98,886 - \$106,530
Position description	<a href="#">376524 21 Role Description (Word, 719KB)</a>

In the role of Senior Engineer (Noise and Air) you will:

- have the opportunity to work with leading experts in the review and development of policies, specifications, and guidelines relating to the management, assessment and monitoring of transport noise, air pollution and vibration resulting from the construction and operation of transport infrastructure projects statewide; and
- be required to assist in the assessment of development applications along the state road network, and the peer review of statewide major infrastructure projects.

To be considered for this position applicants must possess:

- a four-year, Washington Accord accredited, Bachelor of Engineering (Civil/Mechanical/Environment/Electrical) or equivalence which is assessed/accepted by Engineers Australia against Washington Accord benchmarks.
- registration as a Registered Professional Engineer of Queensland (RPEQ). Interstate candidates who don't currently hold RPEQ are encouraged to contact panel chair for discussion.
- experience in noise assessment, modelling, measurement and management.

For further information please refer to the role description.
