

Acoustic Engineer

Adamsson Engineering is a leading supplier of Attenuators, Acoustic Doors, Acoustic Enclosures and Silencers in Perth Western Australian specialising in the field of noise and vibration.

The company has been delivering professional, friendly and timely engineering solutions to the private and public sector across WA for almost 40 years. We pride ourselves on our culture of customer focus, technical expertise and going above-and-beyond for our clients. Over the years our team and reputation has grown in line with demand for our services.

We have an excellent career opportunity for an experienced acoustical engineer to join our team. We are looking for a highly motivated individual who can hit the ground running and assist our existing team with current and future deliveries. This is a full time position, with training and ongoing support. The applicant is to have a degree in engineering and hold a current driver's license.

Key responsibilities and desired experience includes:

- Customer Focus – Strong communication skills necessary to build rapport with architects, mechanical consultants, acoustic consultants and design engineers.
- Site measurements – Technical understanding of noise and vibration instrumentation and analysis.
- Must understand tender documents to prepare quotations as per requirements.
- Able to work independently and dependably within a team environment.
- 3+ Years experience working in Acoustical Engineering or Mechanical Engineering.

Successful candidates will be offered an attractive salary package, commensurate with experience and qualifications. If this sounds like something you are interested in, we would love to hear from you! Applications and enquiries should be sent to admin@adamsson.com.au. Interstate applicants welcome.
