

Senior & Junior Acoustic Engineers – Sydney & Melbourne

With offices in Sydney and Melbourne, we have opportunities for **senior and junior acoustic engineers** to join our expanding acoustical consulting business.

We are focused on culture and provide a relaxed working environment, in which our values of **Respect, Integrity** and **Passion** are the cornerstones. The right candidates will have the opportunity to broaden their business skill set with potential to manage projects, a team or an office, maintaining the principles of our ethos, being **Pride, Unity** and **Balance**.

We are looking for tertiary qualified engineers and scientists, with **5+ years** relevant experience in noise assessment and control and junior engineers and scientists. Our positions offer day-to-day responsibility for management of project tasks, liaison with clients and arranging project site work, measurements, computer modelling, programming, analysis, reporting and managing people.

Employment at Acoustic Dynamics teaches entrepreneurship and provides flexibility in an environment where you work with a team, have a personal connection with clients, are given responsibility, your hard work is recognized and you will be valued as an employee. You will also have the opportunity to work on a diverse range of projects and you will not be pigeonholed.

Skills/experience required:

- Relevant tertiary engineering qualifications (Preference given to Bachelors degree in mech, elec, enviro or audio engineering, science, or Masters in Science (Audio & Acoustics));
- Honours or relevant post-graduate qualifications will be highly regarded;
- Experience in, or demonstrated interest in noise and vibration (acoustics);
- Excellent written and communication skills;
- High motivation to develop technical competencies in noise and vibration;
- High motivation to develop client and project management competencies;
- Demonstrated practical experience in the use of instrumentation and noise modelling software will be advantageous.

Successful applicants will receive supervision and support from our staff with a broad experience in noise and vibration. We will offer attractive salary packages and opportunities for ongoing professional and career development, including study assistance, where relevant.

If you feel you have the skills and experience we are looking for, please email your application to: jobs@acousticdynamics.com.au

Your application will be treated as strictly confidential. Please note – No recruitment agencies and only applicants living in Australia with residency to apply.
