

**Australian Acoustical Society**

A.C.N. 000 712 658  
NEW SOUTH WALES DIVISION

## **TECHNICAL MEETING**

### **Expected output levels from personal stereo players**

- Date:** Thursday 24<sup>th</sup> March 2011
- Venue:** National Acoustics Laboratories
- Time:** 6:30 pm
- Speaker:** Warwick Williams, National Acoustic Laboratories

There is currently a lot of discussion in the acoustical and hearing health world concerning the effects of listening to Personal Stereo Players (PSPs) on hearing health. What are the expected output levels from commonly available players on the Australian market? The study presented here summarised measurements carried out on multiple player - earphone combinations. Are they a hazard to hearing health?

**“Anyone” is welcome to attend.**

**Refreshments will be provided.**

**RSVP FOR CATERING PURPOSES BY**

Tuesday 22nd March 2011 to Tracy Gowen by email
