## hear the latest developments

Pyrotek is a manufacturer and distributor of quality noise, thermal and fire-insulating products for transport, building, marine, and industrial applications, which are tested and approved to the latest international standards. The global expansion has helped the business to innovate and add new development products to its range, Bruce Hermes, Commercial Specification Manager will present an overview of all the latest product developments from Pyrotek.

## latest european technology

Keynote Speaker and international guest Robert Abberderis, Getzner Project Manager for the Asia Pacific region, will bring you up to date with the latest vibration and isolation solutions from Europe using Sylomer® Sylodyn® using examples of working projects and applications. Getzner has been producing materials for the isolation and insulation of vibrations and structure-borne noise since 1975 and is one of the world's leading companies in this field.
