

**Australian Acoustic Society
(WA Division)
Technical Meeting**

**BRUEL & KJAER
Latest Products
NVMS**

Presenter: Stewart Wood

NVMS will be demonstrating the very latest sound measurement instruments from Bruel & Kjaer, including the B&K 2270 handheld 2-channel sound analyser, the permanent outdoor Noise Monitoring Terminal, and the new LAN-XI Pulse Analyser configured for noise measurement. The compact B&K 4447 Human Vibration Analyser and popular B&K 2250 Sound Level Meter will also be available for inspection. NVMS provides the complete range of B&K instruments for sound and vibration measurement, as well as sensors, signal conditioning and analysis systems from world-leading manufacturers such as Schenck, LDS, and HBM. We also operate a NATA accredited calibration laboratory for sound level instruments and provide highly regarded training courses in occupational noise, environmental noise, human vibration, and instrumentation. In partnership with our sister company SVT Engineering Consultants, we also provide engineering training & consultancy services throughout Australasia and South East Asia.
