

Senior Acoustic Specialist

- Innovative leader in acoustic solutions
- Successful business with enviable culture
- Opportunity for leadership role

Why Advitech?

Advitech, flagship of the Advitech Group, is a professional engineering and environmental consultancy with a 30 year history. We have built a reputable Acoustic brand with demonstrated capabilities in noise control and management across diverse industry sectors.

As part of our acoustic consulting services, we are responsible for the design and manufacture of real time monitoring platforms and data analytics. Through the Group's manufacturing capabilities and engineering office we offer customers bespoke solutions not usually available from one company.

Benefits

We believe our people are the key to our success and are committed to a culture where everyone is supported, treated fairly and with respect. Being a part of our valued team includes benefits such as flexible work arrangements, professional development, salary continuance insurance, Employee Assistance Program and access to our Social Club activities.

The Role

We are looking for a **Senior Acoustic Specialist** to join our Environmental Assessments team in Newcastle. As an experienced acoustic professional, you will conduct a range of acoustic activities, be responsible for driving growth in Environmental Acoustics and support multidisciplinary projects within heavy industry, agriculture, transport and construction. If you are looking for career progression, this position will allow you to become a Technical Leader within the business.

Reporting to the Lead Environmental Scientist, the key responsibilities of this role include:

- Effectively scoping projects, and assisting customers understand requirements with regards to acoustic impact assessment
- Technical review of reports, acoustic modelling and fee proposals
- Undertaking noise and vibration impact assessments for a range of industries
- Design of noise and vibration mitigation treatments and preparation of management plans
- Management of projects and relationships with key internal and external stakeholders
- Mentoring and coaching other staff members

Qualifications and Requirements

- Relevant tertiary qualifications, ideally in Acoustic Engineering, with at least 5 years' relevant industry experience in environmental acoustic assessment
- Business development acumen with the ability to maintain existing client relationships and create opportunities for growth
- Technical competency with recent experience in acoustic modelling and acoustic assessments across a range of sectors and project scales
- Good organisational skills and a demonstrated history of successful project management
- A passion for innovative solutions and service excellence
- Good interpersonal skills, the ability to work collaboratively within a team, and a desire to provide mentoring and coaching to other staff members
- Previous experience or a willingness to engage with other technical streams including Air Quality Impact Assessment or Water Management would be highly regarded
