

The Marshall Day team team at its 2017 company conference, Pauanui - New Zealand

## ENVIRONMENTAL NOISE TEAM

### Senior / Associate

We're looking for an experienced acoustic consultant with a keen interest and ambition in planning and environmental noise to join our Melbourne team.

The core role is working with an enthusiastic team on a range of challenging projects from local planning matters through to environmental impact assessment for aircraft operations, surface transport schemes and power generation projects.

The role also provides the opportunity to work on inhouse research and development projects to drive standards and pursue new sectors.

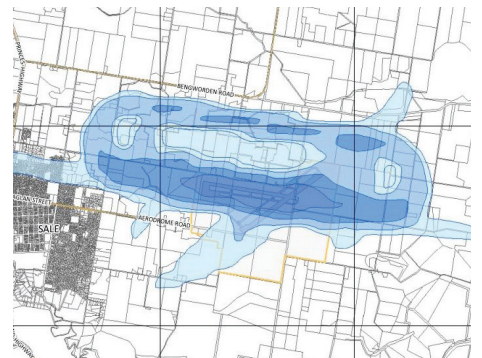

While primarily working with the environmental team, the role will also involve close collaboration with our building acoustics teams and offices across Australia and New Zealand.

The role is for a Senior to Associate level position and will be tailored to match the ambitions of the successful candidate.

We offer a friendly and supportive working environment with competitive remuneration and flexible working conditions.

If you'd like to learn more about the role and meet the team, we'd like to hear from you.

Please send you CV and covering letter to Sally Campbell at [scampbell@marshallday.com](mailto:scampbell@marshallday.com) by Monday, October 22<sup>nd</sup>, 2018.

Examples of our environmental projects, top downwards:  
RAAF Base East Sale (Example N70 contour);  
Uranquinty Power Station; Hepburn Community Windfarm
